

TallyExplorer
Back Office Management Suite

The TallyExplorer Back Office Management Suite harmonizes front end retail operations with the back office environment. TallyExplorer integrates with the TallySales Point of Sale system allowing access to vital information in real time to streamline business processes and provide a higher level of customer service. Whether you are pulling reports, managing inventory, scheduling employees, balancing financials or sending customer communications, TallyExplorer is your fast, simple, accurate, and secure solution. Manage single or multistore operations from a central location, and pull reports and analyze data for better visibility into retail strategy performance that will help grow your business.

Business Benefits

As a business owner, having the right tools allows you to meet multiple challenges on a daily basis. The TallyExplorer Back Office Management Suite not only helps you streamline business processes, it leaves you time to identify and focus on tactics to grow your competitive edge.

TallyExplorer helps you improve operations in the complex back office environment by:

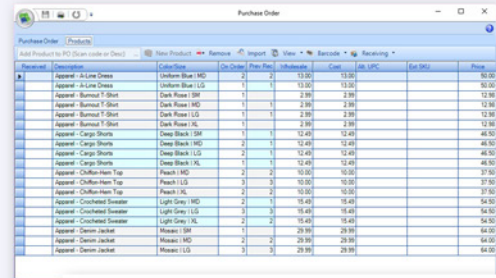

- Automating manual processes for easy data storage and retrieval
- Improving forecast accuracy
- Viewing and managing resource capacity and scheduling
- Empowering your employees to self-manage and track-performance

Features & Functionalities

Total Visibility with TallyReports

The TallyReports feature provides the centralized repository where all data can be analyzed together. As a business owner, this allows you to spend less time pulling separate reports and doing manual comparisons. With a few clicks you can see how sales align with expenses, identify trends, and act based on real-time data to keep your business running profitably and productively.

Data Management

- Pull reports using data from the POS and Back Office Suites to gain total business visibility
- Generate both automatic and customized reports so that the most relevant information is at your fingertips
- Identify trends in employee performance, sales performance, and customer purchasing
- Control security and access for all systems across headquarters or satellite stores

About TallySoft

Since 1988, TallySoft, a division of Point Of Sale Technologies, Inc. has been serving the retail industry with point of sale software solutions. In 1995, the company launched the TallySales Retail Suite for Windows and in 1997, became one of the first 32-bit Windows implementations with open database architecture. Today, TallySoft serves clients across the United States and internationally with state-of-the-art software and highly responsive customer service.
